SUMMARY

Data Science student with a passion for transforming raw data into valuable insights. Specialized in Data Engineering and BI, with expertise in building scalable pipelines using Python, PySpark, and Databricks. Completed a Data Engineer internship at Metis Supplements, building end-to-end pipelines across bronze/silver/gold layers on Azure. Azure Databricks Certified (DP-750). Proficient in dimensional modeling, Power BI dashboards, Docker, DevOps workflows, and cloud fundamentals. Dedicated to producing clean, reliable data and consistently seeking new learning opportunities, whether through certifications or tackling new real-world challenges.

TECHNICAL SKILLS

Languages: Python, SQL, C#, Bash, DAX, TypeScript/JavaScript

Cloud & Platforms: Microsoft Azure, Azure Databricks (Certified — DP-750), Azure Container Apps, Google Cloud

Data Engineering: PySpark, Pandas, Delta Lake, Medallion Architecture, Dimensional Modeling (Star Schema), Slowly Changing Dimensions (Type 2), ETL/ELT, Data Cleaning & Transformation, NoSQL

DevOps & Tools: Docker, DevOps Concepts, GitHub Copilot (GH-300), Shell Scripting, Bash Scripting, Jupyter Notebook, Google Colaboratory, Playwright (.NET)

Business Intelligence & Visualization: Power BI, Power Query Editor, KPI Design, Dashboard Development

Certificates: Azure Databricks (DP-750) ▪ Microsoft Azure Fundamentals (AZ-900) ▪ Microsoft Security, Compliance & Identity Fundamentals (SC-900) ▪ GitHub Copilot (GH-300) ▪ PyTorch & Deep Learning for Decision Makers (LFS116)

PROJECTS

StudyApp - Azure Databricks Exam-Prep Tool 🔗

05/2026

- Identified a gap in structured, itemized practice material for the Azure Databricks Data Engineer Associate exam (DP-750) and set out to build a solution
- Built a TypeScript web app with topic-based review modules, a quiz engine, and progress tracking to reinforce weak areas
- Deployed the app live and used it as the primary study tool throughout weeks of exam preparation
- Passed the DP-750 exam on the first attempt using the app

Airbnb Booking Behavior Analysis - Data Engineering 🔗

08/2025

- Set out to analyze booking behavior and pricing dynamics across 7 European cities to surface actionable business insights
- Designed a medallion architecture (Bronze–Silver–Gold) using PySpark for scalable data processing
- Built a dimensional star schema with fact and dimension tables, implementing Slowly Changing Dimensions (Type 2) to track historical changes
- Implemented data cleansing, enrichment, and business logic across all pipeline layers
- Delivered segmented insights on pricing, satisfaction tiers, lead time, and room preferences by age group

EXPERIENCE

Data Engineer Intern, Metis Supplements

02/2026 – 05/2026

Antwerp, Belgium

- Designed and built end-to-end data pipelines from source systems to analytics-ready datasets
- Developed and maintained ETL/ELT workflows for reliable, scalable data ingestion and transformation
- Modeled and structured data across bronze/silver/gold layers to support reporting and BI
- Implemented data quality checks, validation rules, and monitoring for pipeline reliability
- Delivered clean datasets and documentation for management, supply chain, marketing, and sales analytics

EDUCATION

BSc in Data Science Protection and Security, Thomas More University of Applied Sciences 🔗

02/2027

Expected time of graduation: February 2027
